MEMORANDUM FOR: COLONEL RUSSELL A. BERG  
AFCSS-FC, Headquarters USAF

SUBJECT : Recommended Procedures for Securing AWS Instrumentation

25X1 1. Time limitations have prevented the issuance of adequate instructions to [redacted] of the channels which I believe he should follow in securing meteorological instruments. He has secured the first two packages through his own resources with minimum assistance. It now appears appropriate to establish firm procedures by which [redacted] will secure all further instruments or equipment. I suggest the following:

25X1 a. [redacted] should state his requirements to the Director of Materiel of Project Headquarters. Requirements should include quantity, nomenclature, Air Force Stock List No. (if available), point of delivery, and date delivery required.

b. These requirements will be reviewed by Project Materiel personnel and those which are compatible with the established program will be secured by Materiel people in their established manner.

25X1 c. Project Materiel will notify the Project Contracting Officer of the amount of reimbursement required for Air Force items and the Air Force component through which reimbursement should be handled.

d. The Project Finance Officer will arrange for payment upon notification by the Contracting Officer.

2. If you approve of these procedures you are requested to issue appropriate instructions to the Air Weather Service.

JACK A. GIBBS  
Colonel, USAF

RJS/aem
